# Advertising space

**Bleed calendar: minimum 3 mm**

**Bleed calendar pads: minimum 3 mm, to the top and bottom edges minimum 8 mm for background elements**

Parts of your project that are designed up to the edge of the page need to be extended into bleed. This area is trimmed off during the manufacturing.

**TrimBox:**

330 × 900 mm

**Margins: minimum 5 mm, to the top 16 mm**

It is recommended that no important texts or images are placed outside the inner margins set inside the TrimBox as well as to the creasing lines due to manufacturing tolerances.

-  Punched hole Ø 8 mm (no omission needed)
-  Creasing
-  This area may be used for the design anyway, but is just visible when the block is flipped upwards - e.g. for holiday calendars, annual calendars, other advertising). Each calendar pad is firmly glued to the backer board by approx. 15 mm at the top edge.

**Make sure to remove the layout template from your print file!**
