Title

Make sure to remove the layout template from your print file!!!

In order to avoid white streaks, keep the background colour in the punch area. This will keep the layout colours to the edge after punching. Safety distance around the window edge: 10 mm Corner radius: 4 mm

45 mm

Back

Bleed: minimum 1 mm

Parts of your project that are designed up to the edge of the page need to be extended into bleed. This area is trimmed off during the manufacturing.

Margins: minimum 5 mm

It is recommended that no important texts or images are placed outside the inner margins set inside the TrimBox due to manufacturing tolerances.

Open TrimBox:

248 × 236 mm

— Trim line

- - - Creasing line

■ Colour-free/unprinted area for gluing

- - - Production tolerances possible

(do not place texts or important elements here)

95 mm

This area is covered by the adhesive strip when closed. Only place a background here - do not place any texts / logos or important elements in this area.

16 mm
